CAREER SUMMARY

As an enthusiastic developer with a passion for building engaging user experiences, I have experience working within Scrum workflows and possess strong skills in building and integrating APIs using technologies such as ReactJS and C#. I am driven to create seamless interfaces that delight users. Eager to contribute and learn in a dynamic team, I am committed to optimizing workflows and fostering a culture of innovation.

WORK EXPERIENCE

Software Engineer at PTN GLOBAL, CAN THO (Mar 2023 – Present)

- Business Domains: Government Services
    - Technologies: ReactJs, TypeScript, ASP.NET, Mobx, React Kendo UI, Tailwind CSS, SCSS, SQL Server.
    - Responsibilities:
        - Working with the Scrum master workflow.
        - Discussing with team members and customers to refine requirements.
        - Joining and contributing to evaluate and develop new ideas for the team's processes.
        - Using ASP.NET and SQL Server to write APIs.
        - Using and customizing React Kendo UI components, SCSS, and TailwindCSS to ensure consistent and responsive design.
        - Suggesting new UI/UX ideas for customers.
        - Enhancing logic and user experience.
        - Managing state with MobX.
        - Resolving feature issues.
        - Participating in code reviews and refactoring code as necessary to improve code quality and maintainability.
- Business Domains: AI Assistant
    - Technologies: ReactJs, TypeScript, Tailwind CSS, SCSS, Material UI, Storybook, React Query
    - Responsibilities:
        - Developing UI/UX based on designs using MUI.
        - Using React Query to manage state.
        - Developing and maintaining a component library with Storybook for efficient UI component management and documentation.
